

AWS Certified Machine Learning Engineer - Associate

Notice of Exam Results

Candidate: Subham Kumar	Exam Date: 11/4/2025
Candidate ID: AWS05149491	Registration Number: 520273108
Candidate Score: 772	Pass/Fail: PASS

Congratulations! You have successfully completed the AWS Certified Machine Learning Engineer - Associate and you are now AWS Certified.

The AWS Certified Machine Learning Engineer - Associate (MLA-C01) has a scaled score between 100 and 1,000. The scaled score needed to pass the exam is 720.

As a reminder, you are bound by the [Candidate Code of Conduct](#) you accepted when taking your exam, and you are expected to keep the contents of the examination secure. If you have any questions or require assistance, please [contact us](#).

Congratulations again on your achievement and the ability to claim the associated benefits, such as digital badges and discount vouchers for future exams. To take advantage of the benefits associated with your AWS Certified Machine Learning Engineer - Associate certification, explore the "Benefits" section of your [AWS Certification Account](#).

Thank you,

AWS Training and Certification

AWS Certified Machine Learning Engineer - Associate

Breakdown of Exam Results

The information in the table below details the composition of the AWS Certified Machine Learning Engineer - Associate and your performance in each of the exam sections. The table includes the classifications of your performance at each **section level**.

This information is designed to provide general feedback concerning your examination performance. The examination is scored using a compensatory scoring model, which means you do not need to “pass” the individual sections. Please keep in mind that each section has a specific weighting on the examination, so some sections have more questions than others. This information is general in nature, highlighting your strengths and weaknesses.

Meets Competencies: Performance at this level demonstrates knowledge, skills, and abilities expected of a passing candidate.

Needs Improvement: Performance at this level does not demonstrate knowledge, skills, and abilities expected of a passing candidate.

Section	Score Performance		
	% of Scored Items	Needs Improvement	Meets Competencies
Domain 1: Data Preparation for Machine Learning (ML)	28%		
Domain 2: ML Model Development	26%		
Domain 3: Deployment and Orchestration of ML Workflows	22%		
Domain 4: ML Solution Monitoring, Maintenance, and Security	24%		

Disclaimer: AWS Certification exams are designed to make pass/fail decisions based on the total exam score. Section level results are designed to provide direction on areas where a candidate may be weak. Candidates should exercise caution when interpreting the above section level score information as it is less reliable than the total exam score and not intended to guide future test performance.
